- Never operate equipment of any kind if you are tired or if you are under the influence of alcohol, drugs, medication or any substance that could affect your ability or judgment. Be alert! If you get tired while operating this equipment, take a break. Tiredness may result in loss of control.
- Provide adequate ventilation when operating this equipment. This torch consumes oxygen and gives off deadly carbon monoxide gas.
- Do not use around flammable liquids or gasses, sparks could cause fire or explosion.
- Caution: This equipment gets Extremely Hot during operation

### **IMPORTANT SAFETY RULES TO FOLLOW**

This device is intended for outdoor use only. This torch is designed for a vapor-withdrawal LP-Gas cylinder  
**FOR YOUR SAFETY!**

#### **If You Smell Gas:**

1. Shut off gas to the device.
2. Extinguish any open flame.
3. Check the device for leaks using soapy water.
4. **DO NOT** attempt to relight the device until leaks are repaired and there is no gas smell.

*DO NOT use this device in areas where gasoline or other liquids having flammable vapor are stored or used.*

The propane supply cylinder used with this torch should be no less than 20 lb. capacity and must be designed, fabricated, tested and marked in accordance with regulations of the U.S. Department of Transportation, the Canadian Transport Commission or the Interstate Commerce Commission. Supply cylinders must be arranged to provide for vapor withdrawal from the operating cylinder.

1. Inspect the nut/nipple of the P.O.L. connection on the LP-Gas hose. Check for dents or physical damage. The O-ring should be present on nipple fitting.
2. Be certain the supply cylinder valve is fully turned off. Remove the protective plastic plug from the cylinder valve outlet connection.
3. Connect the P.O.L. nut/nipple fitting on the hose to the propane supply cylinder by turning the left hand threaded P.O.L. nut counter clockwise into the cylinder valve outlet. Snug the connection tight with a wrench. **DO NOT OVER TIGHTEN.**
4. Be certain the flame adjusting valve is closed before opening the LP-Gas cylinder valve.

#### **LIGHTING**

1. Slowly open the LP-Gas cylinder valve. Check all gas connections to the torch for leaks with a leak detection solution, such as soapy water. Leaks will be indicated by forming bubbles around the source. Please allow one minute for bubbles to appear. Repair all leaks and test for leaks prior to lighting torch.
2. Open the flame adjusting valve 1/8 turn or until a small amount of gas is heard escaping. Using a flint lighter, ignite the torch. Do not place your hand or any part of your body in the path of the burner while lighting or operating the torch.

**DO NOT USE MATCHES OR CIGARETTE LIGHTER TO IGNITE THE TORCH.**

3. Adjust the size of the flame by using the flame adjusting valve.
4. Always keep a type ABC fire extinguisher handy.

#### **DO NOT OPERATE THIS EQUIPMENT IF:**

- You are subject to seizures, loss of consciousness, or fainting.
- You have been drinking alcohol, using illicit drugs, or prescription drugs that might affect your judgment or balance.
- You have not read or do not understand these instructions.
- You are not capable of safely operating this type of equipment.

**DO NOT ALLOW CHILDREN TO OPERATE THIS EQUIPMENT.**

If the person receiving this handout will not be the user of the equipment, forward these instructions to the operator.  
**IF** there is any doubt as to the operation or safety of the equipment,

**DO NOT USE!!! CALL A TOOL SHED IMMEDIATELY!!!**

**FAILURE TO FOLLOW THESE INSTRUCTIONS COULD RESULT IN INJURY OR DEATH**
